# THE BEST OF THE SHOW...WAS THERE A WINNER?

If you were to ask a dozen people who were at the Winter Consumer Electronics Show what the game of the show was, almost everybody will, think for a while, and then say Nintendo's FX chip game StarFox. I know this for a fact, as many of our own editors have said just that.

Well, they all are wrong.

Granted StarFox is new and revolutionary, and plays and looks great, but it just wasn't so good that it could be called the Game of the Show. One reason why it stands out in everybody's minds is that Nintendo knows how to hype up a game. They don't just put a few carts out for people to play, they think big. So big in fact, that they built a whole geodesic dome around their StarFox display. It was hard not to think of that game while at the show.

Then what was the best of the show? It was an obscure Sega CD title called Silpheed. You see Sega doesn't like to brag about their games. In fact they did everything possible not to call attention to that game.

First, they knew ahead of time that Nintendo would be hyping up their polygon graphics game. So they decided to take theirs and hide it, by putting it in the middle of a bunch of their other CD games. There was no need to run a Silpheed/StarFox side-by side comparison as they once did with Sonic and

Next, in case if anybody would accidentally see their revolutionary game, they decided to have a 20% unplayable version in the machine. There was no reason to show the nearly complete version that was on display at Sega Fair in Tokyo in December.

Finally, to keep the game completely secret, Sega decided not to mention it in their press kit. There was no need to tell the world that Silpheed had over 500,000 polygons on the planet level alone; that Silpheed moved along at 20 frames per second; that Silpheed uses advanced fractal geometry to calculate the texture mapped highlights and shadows of the detailed geographical features; that Silpheed had pounding music and sound effects, all encoded in stereo, surround, PCM, CD quality sound.

Sorry, Sega. But I just couldn't keep it a secret anymore. Silpheed was the real Game of the Show. If you doubt it, check out the pictures on page 52. Forget FX chip technology. CD is where the action is, and Nintendo's unit is at least another year away. Sega has it now.

But don't tell anybody, as Sega wants to keep it a secret.

In other news, we have a great issue for you this month as we have a lot of great bonuses packed inside, like the special foll cover, a Street Fighter comic book, a 32 page guide to portable games and accessories, an exclusive X-Men poster and strategy guide, and, if you are a subscriber, a special Quartermann newsletter.

As always, we welcome your comments, criticisms and suggestions.

# ASK, AND YOU SHALL RECEIVE...

After I saw the pictures of Time Gal and Road Blaster FX in your November and December International Sections, I called Renovation to ask them to bring out these games in the U.S. I told them that type of game would appeal to a lot of players because they use the old 'Dragon's Lair-type of control.' They were very patient and listened to what I had to say. They then asked me a bunch of questions. Sure enough, they are now going to bring it out here in America. I urge all game players to 'speak up' and if you see an international game in EGM that looks good to you, call the U.S. company and tell them that you are interested in that type of game. It worked for me!

> Andy Woodsen New York, NY

My favorite Sega CD game is Cobra Command. I have just seen the Renovation ads for Road Avenger, and that game is now on the top of my 'to buy' list. Back in your November issue you showed pictures of a Japanese game called Time Gal and it looked very similar to the other two. Last issue you said that it is coming out here in the U.S. and this made me very happy, but I just read in another mag that it isn't coming out. I want this game bad! Tell me that somebody will be doing it here.

Dave Halston Encino, CA

Because the U.S. game players asked for it, Time Gal will be coming out this spring!

(Ed. There is a very important lesson that all game players should learn from Andy's letter. If you really want a game to come out here in the U.S., let the company know about it! If enough players call and write, the company will give it serious consideration. Does it work? You bet!!

In the case of Time Gal, Renovation's president Hide Irie summed it all up in the Time Gal press release:

"Due to overwhelming requests and interest from American game players, I'm happy to say that we're bringing Time Gal to the United States."

This is but one reason why we have an International Section. Not only does it give the American players a preview of future games that companies have announced will be coming out over here, but also, as in our coverage of Time Gal back in our November issue, it gives the U.S. players time to call the companies who haven't decided whether they should spend the time and money to convert the Japanese games. We'll keep up the coverage so you can make the calls.)

## SUPER SCOPE IS COLOR BLIND!

Have you been having problems beating your favorite Super Scope Game? Do you swear that you keep hitting that enemy, but it just won't die?

Don't be quick to blame yourself!

Does the Super Scope have you seeing red? That's because it can't!

EGM has obtained from sources in Japan a new technical document that describes the construction and specifications of the Super Scope for the Super NES.

In this publication, Nintendo states that "The Super Scope is not sensitive to [the color] red at all."

They go on to say that this is because the color red in our TVs stays on the screen (called the period of florescence) a relatively long period of time (four times as long as green and about 5 times as long as blue) before it fades away. Since the gun needs to detect and time events very precisely, by the time the red color fades away, the enemy would have registered a 'missed shot'.

# LETTER OF THE MONTH!

The article below ran in the New York Post on January 13, 1993.

# **VIDEO GAME MADDEN-NESS** Toymakers use sports to sell kids on violence

by: Phil Mushnick

Funny how things work out. This past Friday in a column that ripped the NHL Players. Association for licensing a Sega home. video game - NHLPA Hockey 93 - that introduced hockey to children as a game steeped in mindless, graphic violence, a photo of an NHLPA- icensed Super Nintendo hockey game was m stakenty used with the column

But a funny thing happened on our way to making things right with the fine folks a Nintendo Before we printed an apology felt compelled to check out the Nintendo version of the NHLPA's marketing endeavor. So we headed to Toys. A Us.

There will be no apology

What we lound at the toy store was more than disturbing it was sickening and depressing. Everyone's working off a copy of the same twisted plan in a society now dripping with senseless violence, adults are getting nch pitching sports games to children by placing a premium on that same senseless violence

First off the NHLPA's Nintendo version of the video game is dually the same as the NHLPA's Sega game the object of sell is lighting maining and delighting in the graphic vi-The beauty and skill of hockey does not enter the marketing equation

The Nintendo people like the wonderful folks at Sega and the NHLPA can go straight to hell. Their sales strategy is geared more toward child abuse than gamesmanship or sportsmanship

Near the rack that held the NHLPA's games, we found a Sega basketbal game - Arch Rivals. The sub-title of the game was Basketbrawl. The game's object was clearly stated on the packaging "No Fouls - Knock Your Opponent's Block Off" We wondered if the Sega people were ignorant to the Rudy Tom-

janovich story or whether it provided the inspiration.
Toys A us we began to see now serves as headquarters for kids ooking to get a leg up on the brutal world that awaits them Still we hardly were prepared for what we saw next - a Sega home video game with John Madden's smiling face beamin from the cover of a cartridge that retails for \$60. John Madden Footbal 92 The packaging's come on messages eff us

Crush the guarterback - knock him out of the game

"Biggest play of the year quarterback sheak to the hospital" program that sends a computerized ambulance onto the field to neve the QB. When the ambulance drives off, the computer

zed players who get in its way are run over. Fabulous! Next to John Madden Football '92' we found John Madden Footbal 93 Same as last year's edition except for a few added attractions including "clothesline tackies

We thought about Denn's Byrd. We thought about Darryl Stingley and Jack (The Assassin Tatum and Mike Jiley and Jeff Fuller and Chucky Mullins and Marc Buonocont

We thought about an interview MSG's Bob Page conducted last month with Nick Buonocont who lashed out at a new NFL Films home video "NF, Rocks" which features mostly illegal hits in is above the shoulder de ivered with the helmet. And all set to rock music

And the very next afternoon, we thought about them all again as we watched a real ambulance drive onto a real footbail field and cart away Steeler Ineman John Jackson dunng the Buffa o-Pittsburgh playoff game

We wondered if the same kids who de ght in the appearance of the ambulance in John Madden Football '92 and '93 were watching the Bills. Steelers and whether they were delighted that Jackson was being ifted into an ambulance, and whether they were disappointed that the ambulance didn I mow down any players as 1 elt the field

And we thought about John Madden, whom we know as a decent man and a caring parent. What in the world was Madden thinking when he turned over his name and his image to the makers of a footbal, game that promises to entertain children by crushing the QB so that he might be shipped to the hospital via

We reached Madden Monday at his home in California He said his association with the game's designer goes back 10 or more years, when Madden agreed to program football plays for

"My idea was to help make an 11-on-11 game - draw up the plays the defenses. It was a fun thing not a money thing. My part is not as a computer guy. My contribution is the lootball I ve added the run and shoot offense inickel defenses, things

But what about how the game has you should excuse the term evolved? What about the on the cover salesmanship that appears beneath Madden's name and picture, salesmansh p that promotes football to kids not as a sport, but as a conduit for mindless graphic violence?

"I didn't add those things " said Madden "They [Sega] just copy things they see in the game. I ve never seen the ambulance come out, and I m told that the ambulance comes out

Yel. Madden did not dispute the fact that an ambulance is dispatched to fetch a crushed QB as part of the game's computerzed program. And he did not dispute the fact that such elements are featured come-ons in the game's sell

And how about "clothesine tackles" serving as a featured added attraction in the marketing of John Madden Footba 1937 Clothesline tackles are part of the way the game is played said Madden." As long as you don't hit em in the head it s

Not quite NFL rules prohibit clothesline tackles of any sort "But " said Madden " I never want to see anyone get hi So then was Madden short on vigilance, given that his good name and image are used to market this product to children? Is he upset that his celebrity status is being exploited to ser a game whose printed cover promises children the apportunity to

knock quarterbacks out of the game and into the hospital? " don't know if i'd have used those words." he said " I don't want to see anyone get hurt, and I hope I would never be a part of something like that. But the things you're talking about, are not a big part of the [Sega] game

But they are part of the Sega game, and they're a big part of how Sega priches the game to kids

Had Madden been present when elements such as the ambulance were added, and when the printed packaging that promised kids the opportunity to land a QB in the hospital was suggested would he have allowed such salesmanship and damesmanshin'

"Probably not" he said "But what do you want me to do have them recall the games?

No but we wondered what Sega's John Madden Football '94 might ook ike

Well the stuff we've ben taking about won't be in there next rear " said Madden leaving us with something we didn't find at Toys R Us -- some hope

Wow! Can you believe this guy? Never have we seen, in print, a story that was so far off base as this one. Mr. Mushnick, you made at least two fatal mistakes.

First, you have trashed the two best sports games on the market. Not only have all game magazines called these carts the best ever made, but even non-game related mags have given these carts similar praises and awards.

Second, and most importantly, you really show your ignorance by calling Nintendo a company that condones and exploits violence. Ask any kid and he will tell you that Nintendo is the last company that would ever allow excessive violence in a game.

And what is really sickening is how you relate the real life sports injuries to the kids playing video games. The accidents were tragic indeed, but football is a violent sport. As such there will be clothesline tackles. late hits and other bad plays. Perhaps the problem isn't with this generation of kids, but rather with the way the sport is being run.

To jump on Madden is also plain stupidity. He helped create the most realistic-playing football game ever made. Coaches play it, players play it, perhaps you should have played it. If you would have, you would have seen how the game does play like the real sport.

You might also want to give kids some credit for seeing through the typical PR hype. Kids want a good playing game. The Madden name means quality not violence. It didn't get to be the best-selling sports game by accident.

Everybody, of course, is entitled to their own opinion about video games. What is sad, though, is when a quality newspaper like the NY Post prints such a biased, one sided, unresearched article such as the one above.

What do you think? Did Mr. Mushnick escape from the funny farm? Or are our sports games really that bad? Write in and let us know.

Few have faced Dracula and survived. Now it's your turn! Based on Columbia Pictures' blockbuster thriller, Bram Stoker's Dracula for the Sega CD goes straight for the jugular. Digitized scenes from the movie, 3-D graphics and incredible CD sound plunge you deep into dungeons infested with spiders and packs of bloodthirsty rats. You'll battle your way through seven terrifying levels, from the treacherous mountains and forests of Transylvania all the way to Castle Dracula. And just like in the movie, Dracula will attack as a bat, a vicious wolf, even an old man. But whatever form Dracula takes...make no mistake, he must be stopped!

Bram Stoker's Dracula. IT'S A WHOLE NEW GAME.

Coming soon for SNES, NES, Game Boy, Genesis and Game Gene.

# SF2 BOSS CODE!?...

I couldn't believe my eyes when I saw the SF2 Game Genie codes in your last issue. Of course I immediately gave the codes a try. To my surprise, sure enough the bosses were there and after a bit of practice. I saw that by doing Ryu's moves I could get Bison to do all of his moves. Although the game glitched out after the first round, it was fun. If anything, doing this got me to finally realize that there aren't any hidden 'natural' boss codes in the game, as if there was some buried trick to get them to show up, your Game Genje codes would have revealed Bison's secret moves.

> Chad Rice Portland, OR

I saw some SF2 boss codes in another magazine. Unfortunately they were for the Pro Action Replay instead of the Game Genie (which I have). Like a fool I ordered the PAR, only to find out that their codes won't let me play as the bosses, and the supposed match-ups between the two bosses would not work. There was no way to play Bison vs. Bison as they showed. Looking back at their pictures I realized that I was duped; none of the shots with the so called matches showed any action, just the introduction screens.

Richard Guerrero Cambridge, MA

Thanks for the Game Genie SF2 boss codes I wish they would have worked for more than one round, but at least they worked! Did you know another magazine ripped off your codes in their February issue?

Josh Pixton Austin, TX

Play one round of a two-player Boss vs. Boss game in Street Fighter 2.

(Ed. As we have been saying for quite a few months now, there is no way to play a complete Boss vs. Boss game with the Super NES SF2 cart. Of course this a very emotional subject as everybody "knows" that Capcom had to have hidden something in the game and when a mag says they found a code, these emotions really run wild, as they did in Richards case

Again, as the GG codes verify, there is nothing hidden in the game. The GG and PAR can change things that are programmed in the game, but they can't add something to the program.

Since there were no programmed controller moves for Bison, something 'existing' has to be used. Our codes take Ryu's moves and assign them to the movements of Bison. For example, if you do Ryu's hurricane kick you will get the on-screen Bison to do his Flaming Torpedo. As you would expect, the game glitches, as it is doing something that it never was intended to do.

We have been working with the PAR for some time and it isn't easy to get working codes for the Bosses. That is why we didn't print worthless codes just to show two Bisons on the screen for an instant. We don't consider that to be a trick that our readers would like, especially when most readers don't have the PAR. We also aren't in a side business that coincidentally sells the PAR.

As to our Game Genie Boss code, once our mag hits the streets, the info is fair game. You should know that Game Genie codes are as unique as passwords, though. It doesn't take a rocket scientist to see where the other guys are getting their info.)

# **MORE SUPER NES NEO-GEO**

I really like to play the Neo-Geo games but I can't afford the home system. Paying over \$140 for one game is out of my budget. I do have a Super NES. Since Takara is bringing out Fatal Fury, will they also do World Heroes and Art of Fighting?

# TOP SECRET SPECS ON SEGA'S 6-BUTTON CONTROLLER!

Sega has finalized the specs on its upcoming 6-button controller. While most of the details remain the same as those reported in the January EGM Express column, sources in Japan have told EGM that there have been some rolling changes made.

Sega's 6-button controller will be upwardly compatible with the 3-button controller!

First there will be a new button on the back of the controller! Tentatively called the MODE switch, this button will be used to tell the Genesis what type of controller is plugged into the system. It will work like this:

By holding down the MODE button when turning on the system, the pad's 6-button mode will change to that of the 3-button pad. This will be useful when playing older, 3-button controller games.

The MODE button can also be used as a 'select' button, or during game play, its use can be combined with either the control pad or three main buttons.

There will also be a configure screen in the games that will allow the player to select whether the controller has 3 or 6 buttons.

In fighting games the X,Y and Z buttons will be used for weak, medium and strong punches. The A, B and C buttons will be used for weak, medium and strong kicks.

Note: Software written for the 6button controller is planned to also work on the old 3-button controller through the use of pressing a combination of buttons!

## SUPER MEGA MAN?

I wrote this letter in capital lettering because I want it read. I have been an avid reader and buyer of EGM ever since its third issue. I truly believe that what you print is fact, but now I must question your sincerity as to your claims to have seen or heard of a 16-Bit Super NES Mega Man title. I was so excited to hear this that I called Capcom to see when it was going to hit the stores and they said that a 16-Bit Mega Man game was not even in the planning stage. I said that EGM mentioned it in their mag and even on its cover. The guy at Capcom then asked me if I ever read the Enquirer. EGM is not the Enquirer, I said. Every time someone questions your credibility you prove them wrong. Please do it again.

> Lee Berlin Gaithersburg, MD

Watch for the 16-Bit Super Mega Man to come out late in 1993.

(Ed. We talked to Capcom at the CES and they did say that the game was going to come out late this year. We weren't able to get any pictures as we understand the game is so new that no pictures of it exist yet. And since we got our CES coverage to you so quick, it is quite possible that not everybody knew about the great Mega Man news. Everything is cool now. As you can see from the press release, Capcom has formally announced the cart and we recommend that you stay tuned to EGM for the latest info on this super soft. Does this set your mind at ease Lee? We wouldn't steer you wrong!)

Street Fighter 2 is still dominating the artwork. How about something original like the 'alitch' letter?

Note: Only normal (4 x 9 1/2" or smaller) envelopes will be allowed from now on! Put your name on the back. All winners get a free EGM 'In Your Face' T-Shirt and the first prize is a superheavy-duty arcade-quality Fire Stick from G & C Manufacturing.

# **NUDITY IN EGM...!**

I have a complaint about the cover of your February issue. On the cover, there is a picture of Bubsy the Bobcat. He has a shirt on, but where are his pants? Many people would take offense at seeing this. Although the art is very good, I am very surprised that you would do something like that. Please tell Bubsy to buy a pair of Levis.

Mitchel Katz West Bloomfield, MI

Has EGM gone too far??? Does Bubsy need pants? Should Sonic get a jogging suit? Are the TMNT too risque?

(Ed. Nice try Mitchel. If we wouldn't have had a shoe-in for the psycho letter, yours would have gotten it. Why don't you go bother the people at the zoo to get them to put boxer shorts on the elephants. Anyway, why pick on Bubsy? Other animals like Sonic, Tails and the TMNT have appeared nude on previous EGM covers and nobody has complained until now.)

# **DIRTY DISCS...**

I would like to know if you can use regular CD audio cleaner on your Sega CDs. I asked the Sega Consumer Department and one person told me that I could, and the other one told me that there wasn't a need to do it. I got a smudge on my Night Trap game and I can't get through the hall between 7:00 and 8:00. What should I do?

De'shon Boynes Chicago, IL

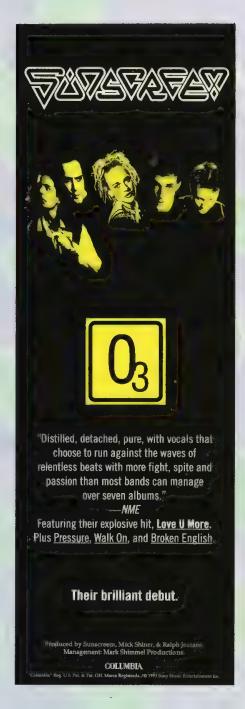

(Ed. Actually both of the people at Sega were correct. Usually a 'smudge' will not stop the laser pick-up from reading the data on the disc. Where you run into problems is when your disc is badly scratched or warped. If you want, you can clean the disc with an audio CD disc cleaner but it probably won't solve your problem. It seems to me that your problem is more game play related rather than electronic. Try following the times that we listed in the February's Tricks of the Trade section to get you through the game.)

**Death Tower:** In a futuristic gladiator battle, it's a fight to the finish against replicants.

Paradise Club: You sniff out the aliens' bizarro plans but now they're on to you dude.

Earth: Oops! Your identity is uncovered. Now robot cops want to pulvenze you.

Planet Morphs: Surprise! You show up at the aliens' HQ. They don't look happy!

Exclusive 14-page Marvel® Comic Book included inside the package.

Hashback – the first game ever to pump awesome high-octane CD ROM performance from a cartridge. The action screams along at 24 frames-per-second. Just like movie animation. And after each level, the game moves along with animated sequences that are straight out of Hollywood. Excellent!

The Plot? You play the part of Conrad Hart, a GBI agent in training. You stumble on a bizarre alien plot to conquer the earth. Now you've got to outwit and combat droves of replicants, deadly aliens, traps and other stuff too weird for words. No problem for a pro like you...NOT!

Still not convinced? Then check it out at your local game habitat. Flashback -- it's like putting your Genesis into warp drive.

OF THE TRACKOT PETERSE AND

It's the year 2050. The world as we know it has become a desolate and desperate place. The Megacorps control everything, and a resurgence of magic is making survival near impossible.

In Data East's Shadowrun, you are a shadowrunner, delivering between the law. Begin your journey in the morgue and travel the streets, stopping at the Grim Reaper tavern for clues. There's a bomb somewhere...

Although the story moves quite slow, I was able to appreciat the detail built into this RPG. While the graphics were only average, this is typical of this genre. I had hoped that the stands build have been better but the qualitation most important part to the game. Data East did a good job in delivering the goods.

There haven't been many good quest/IPG games da and I am glad to say that Snacowar is one of the better ones in this of gory. The story doesn't move along ery quickly and I really had hoped to twould have had more action. Start is a game that will appeal to fans of this genre.

This cart has a really cool storyline and gets more interesting. You play. There are a few humorous germents and lots of things to interact gifth the graphics are not too impressive and its sound support is very weak. The gas will definitely appeal to RPG and thousand the graphics are might not be too impressed with this cart.

Shadowrun is a really good RPG sporting plenty of items a to interact with. The quest is long and rough, but it moves slow enough the sep your head on straight. Shadowrun ay not be very exciting, but any as of the board game will be very plead to pick this one up. The music gets annoying after a while.

He'll also send the vacuum cleaner after you! You won't find solace in the kennel, however: vicious German Shepherds are eager to make your acquaintance! Give the dog a bone!

This is another one of the carls that just isn't quite there. If you ontrols would have been tightened up then Family Dog would have been a good game for the younger players. The sancept is very good and the games are appropriately done but it falls show execution. The cardoon tie-in is a good dea.

I think Family Dog is a good game for the kids. It took a bit to hormal to get used to the controller mavements but, after a while the gath becomes very enjoyable and a lot of the top lay. The levels could have been darder but considering the target at the ce they are probably OK. Too easy for my liking.

The graphics are very cute and kids may relate to the cartoon and quality of the game. The control is very poor and it keeps the cart i gin really being fun. There are a lot of date an mations and the dog's antics are suity in any. The game is too simple and offer title or no challenge. Kids may be disappointed by it.

Family Dog is a good attempt at bringing a cute cartoon to the oscreen, but somehow the full was left behind. Throughout the gime, ou can conquer each level with a minimum of effort! You can run through each level almost nor stop! Yea. Kids the enjoy the control, and veteran gamers will dislike the action.

# Q-LETTER FOR EGM SUBSCRIBERS ONLY!

# The Q-Mann Plugs In...

...Welcome to the first installment of the Q-Letter, your one-stop source for the latest inside info on the hottest topics in video gaming! There's plenty of trank to talk about kiddies, but this month yours truly will focus in on the battle between the systems and the shape of game machines to come. We've heard a lot about the killer consoles and the games they'll play - now it's the Q-Mann's turn to deliver the dirt on what will win big and what will fail with the most giant sucking sounds (did you say Atari?)...

...The Q-Minator is hot on the heels of what could be the biggest new name in town - Jaguar. Yep, the super 64-Bit (really, guys, this is the marketing equivalent of a brown snowstorm - 32-Bit is almost believable, but if you're going to go that high, why not just give it a REALLY impressive number like 1,000,000-Bit) was hailed by most tech-heads at the recent CES as *the* mega machine of the show! Sure, it has RAM problems that cripple its lightning-fast processor and advanced graphic chips (we're talking polygon heaven here boys and girls), but if the Masters Inside Atari (MIA?) screw their brains in straight we may see this system get the attention many say it deserves...

...Now the Quarter-fiend comes to the 3DO. The hardware brains behind Trip's miracle machine are totally dazzling, but its the price! OUCH! The Q-Mann has mixed feelings on this next generation monster. If your pop is the president of Federal Express or if you have a bank named after the family, I say go get it! There will be tons of softs with big guns like EA and Paramount offering most of the muscle. If you find yourself saving for months to get a Lameboy, er, Gameboy cart, 3DO may not be what you're looking for. Of course the 3DO promises games via cable and low monthly rental fees (I sound like a furniture ad) in the future, so don't write it off just yet...

...It has been a few months since the guru of gossip threw some ink at the upcoming wonder-machine from Sega, internally code-named the Giga-Drive. Although you'll never see a system bearing that name, the Q-Mann has heard directly from a top-level suit in Japan who not only confirms the existence of the console, but indicated that such a device may find its way onto store shelves in the Land of the Rising Sun as early as this year! SOA champs deny such rumors, but with the Genesis selling at a number one speed and the Sega CD firing all thrusters, a new hunk of hardware is the last thing they want to see. Giga is supposedly going to operate at 32-Bit with an 11MHz processor, but is unlikely to support much of Sega's System 32 arcade architecture. Great games and downward compatibility with the Genesis and Sega CD are also among the rumored features of the vid industry's current big-hitter...

...Now I know the Turbo never really picked up the speed it may have deserved under NEC's direction, but that hasn't stopped plenty of activity from brewing for a major mega-bit assault on the market by TTI! The 32-Bit system which EGM exclusively previewed a couple of months back is now in the final stages of design, with a street date still tentative but due sometime this year. The Q-Mann, despite all the best attempts, has had difficulty pinning down game names, but a demo tape crossed my eyes which showed off the system's graphic superiority. Hold onto your seats because TTI is rumored to be making plans to deliver the Hudson design with a CD-only interface, eight button controllers, and instant on-screen morphing. Groovy!...

...Up in the attic are continued industry gossip on a possible Nintendo color portable (the Q-Mann gives this design the blg diss), split opinions on the Pioneer laserdisc machine that comes with game systems to plug in, and the Nintendo CD-ROM (check out the full specs courtesy of yours truly in the April issue of EGM and expanded coverage in the April edition of Electronic Games). Regardless of their outcome, you can bet on hotter hardware and better games to come...

- OUARTERMANN

# OUARTERMANN'S "OVERHEARD AT THE CES" COLUMN

...While undercover during the recent CES show in Vegas, the Q-Mann overheard plenty of interesting talk from those in the know. Sure, its true they had no idea that the one and only doomsday journalist was near, but I guess that's the price you pay for talking too loud over a lousy burger...

- "Get out of the way, the bow tie monster is coming..."
- "Why wasn't Total Carnage in the Acclaim booth? I read in that EGM rip-off that it would be here as a 12-Meg game..."
- "Hit me."
- "Nintendo told me that Street Fighter 2 would never come out for another system..."
- "Nintendo told me that Street Fighter 2 would be out on Sega later this year..."
- I'll trade you three Ken Lobb cards for a Howard Phillips..."
- "Wasn't that the buffet where they had the food poisoning scare..."
- "If Sonic CD is so good, why isn't it here?"
- "I didn't realize that was Martin Alessi. What happened to the WD-40?"
- "No! That's not true! That's impossible!"

tranked action that includes moves like the pedestrian plow!

Road Avenger Isn't much of a game, but, like Cobra Command before it and Time Gal soon to follow, it is a gas! The cartoon footage is straight from a Japanimation and is good for a few laughs. # STARFOX

The quality and presentation of this title is absolutely obscene.

Leave it to Nintendo to keep the first Super FX cart for themselves...and what a cart it is. Developed in the U.K. by Argonaut (the same group that developed the SFX chips), Star Fox takes home polygon gaming to an all-new plateau. Between the massive number of explosions and on-screen fighters, to the overall inten-

sity of the battles, StarFox scores big with the boss of goss.

Count on plenty of depth in this head's-on, eye's-up blast-a-thon, but watch out for the flurry of copy-cat poly games that are sure to follow (maybe we'll finally get a decent version of Hard Drivin' on a home sys.). The word is kick Nintendo, and you did some all over the place during the CES show! Bravo!

# **EMPIRE STRIKES BACK**

This little gem, hiding in one of those back rooms at the CES your mother told you never to venture into, was undoubtedly the best of the show (where did you EGM guys get Flashback? It was Silpheed all the way for Best o' Show).

The second 16-Bit Star Wars epic from Lucas is cranked up even more, with awesome mode 7 screens of snowspeeders with back-

ground definition that left the Q-Meister awestruck!

Although this cart was far from finished, the wizards at Lucas assured me that no expense would be spared to insure that the follow-up to their brilliant Star Wars game would be just as good. Mark the words of the dirt driver, Empire Strikes Back will have everyone licking their chops and waiting for more. My only question is: Where's Jedi?

	TOTO SECTION:

Don your special assault outfit and become Super Turrican. You and the U.S.S. Freedom Forces are trying to free a captured planet. This new action cart by Seika pits you against an army of opponents, including flaming steam pipes, face-huggers and giant beasts. You will have to utilize your Turrican skills to liberate the planet. Collect powerups and icons to protect you and to give your guns concentrated power.

There have been other versions of this game done for various. This but this is the best of the bunch. The graphics are very well done, the cool is right on the money, and the arms is impressive I liked the longer the average quest and the power-ups we better than average. A very well done game.

Although few players will be able to experience the Dolby School soundtrack, take it from me it in puts by ding. Throw in exceptional graphins and lots of super intense action and its line action game of the month for me if the the idea of hidden power-ups as add more of a challenge to the game. Outstanding!

A great playing and great looking action cart for the Super The action is intense, with lots (wear is and tons of enemies. The must is great and features Dolby surround stand) be game play is very good with process introl and plenty of techniques. When strous levels, the action gets a tad repetitive

Super Turrican is an excellent multiscrolling action title. Super NES! It doesn't have much of the sur of other fullblown mega-hits, but has plenty of power-ups, technologies a cool sounds to keep you blast a Or hing that surprised me was control and response.

Step into a futuristic race car that has a top speed of 200mph! Sega has changed the face of road racing with the hi-tech Outrun 2019.

Grueling routes to choose from include cross-country, ancient ruins, futuristic cities and icy roads. Obstacles such as other cars and trees will put your driving skills to the test. Your turbo boost will kick in for those tricky passes and ramps. Get ready for the ride of your life!

For some reason Sega has never been able to do a good game on the Genesis. This future of version of Outrun is no exception, less saling is not as smooth as I expected to be and there just isn't much attack a between this and the previous and s. While the challenge is there it just goesn't look good.

I had hoped that with all of the programming experience and y would finally get Outrun to be one of those 'wow' type racing games are getting better, we still is a lot of room for improvent Perhaps there just isn't enough means of I guess I will just have to wait until Batman CD.

What happened! If this is what the future holds for cars, I'll still the classics. The graphics are very guippy and fail to give the effect of real disease. The game play is OK and the only really overment is the power boost after your out your speed. The game nees a variety and the music and sounds are tame.

Outrun 2019 is a good idea, but there isn't any challenge! You in the too few cars, obstacles, or hazard a make the game a real challenge. The four isn't quite up to Outrun standards their this will be the power toos and the multi-level tracks, how twist to the old theme.

And you thought the Ninja Turtles were tough! Tradewest's Battletoads have jumped onto the Genesis for a battle to save their friends.

Help Rash and Zitz rescue Pimple and his girlfriend Angelica from the evil clutches of the Dark Queen. Combat this sinister lady with punches, kicks and jumps. Re-energize your strength meter with flies you catch along the way. Listen to your vulture friend... or it may be too late!

If a company is going to bring out the same game for the system can findle. While the control is very gother than graphics just aren't up to the Graphics sistandards. It still is Toads and a suffern, but with more effort it could have been spectacular

Tradewest did a good job in translating the Battletoads gar to the Genesis. The cute any attorn are built in as are all the trouble one seems. I would have liked more apen but the game is very challenging and might difficult. Almost frustrating.

This is basically the 8-Bit game with a little bit of graphic and enhancement. Nothing wrong we'ff the improvement is that draws, the game is still great with lots of leaves and dilarious animation. The game is still great with lots of leaves and dilarious animation. The game is still great with lots of leaves and dilarious animation. The game with a still great with lots of leaves and dilarious animation. The game with a little enhancement.

I'm really beginning to wonder if the Genesis is really 16-1 fisasters like Fatal Fury, it's hair not to wonder. Battle-toads is no exception mere did the 16-Bit go? I felt like 1 playing the 8-Bit, and in fact, I like 8-Bit better. It's a good game, but esn't feel like a solid 16-Bit title. I'm just disappointed with it.

The Bogard boys are furious! They are in search of Geese Howard, the "King of the Fighters," to avenge their father's death. Joined by Joe Higashi, the three will track the merciless Geese to the King of the Fighters tournament for a final showdown of revenge.

You will pick your first opponent and destination. Each of the three men has four special moves. Use these to unload your Fatal Fury!

I liked the Super NES version of the game and really expected the presis copy to be equally as good Uniprunately, the moves were very signification of and in this type of game sates econd, liming is very important. It just usen to tree. The graphics are excellent but out control there just isn't a game.

Learning to execute the moves in this game was a very described as experience. It isn't that the control was pad, just that the timing has to be presented in the heat of battle, it was very clinical to have to concentrate on how by game moves just so. Great background good animations but needed more control.

Sad to say but the Genesis version is not as good as I would be enoped it to be. The game play suffers from slow response and the section has been been been been difficult to activate Even by the two-player mode the game author. You end up in a throw-fest because other moves are too hard to do.

Fatal Fury on the Genesis just doesn't come across, to me good fighting game. One of the sto lake this game work is to have a good oystick. Forget about using a pad as the control just isn't there. The new lass loves are cool though and the last of the game. The two player mode is decent.

Time Gal is a good follow-up to Road Avenger and Cobra Ganad. Although the earlier levels are gun easy as you have a fair amoun of the to react to the on-screen prompt this action time gets shorter and short easy move up in the game making it.

Great backgrounds!

Maybe it's just me, but I don't care for this type of game. The grands are very good and have cartoon dearly. The animation is very impressive and the game play is nothing more than per norizing which direction to press

Aaah! Time Gal is a Sega CD title! Thanks, Renovation to the Mega CD version, and am apply usee the same crisp graphics, solution, and intriguing adventure is still start by the translation. I expect to be several games of this format soon, and some they all take a lesson in good programming from this.

The Tiny Toons gang has just been invited to the grand opening of a new amusement park. But behind this opening is their enemy Montana Max, up to his old tricks.

Konami brings us the latest Tiny Toons adventure: Trouble in Wackyland. Guide the Toons through all the rides, where they must fight off Montana's ruthless gang. If you survive, then you may enter the castle, where your secret admirer awaits.

This is definitely a good game with lots of simple action for the process of give them this cart and they will be accupied for hours. The game play is easy and not for the experienced play to be a posidering that this is a NES great better players have probably a migrated to the Super NES.

Another good game for the younger audience. The challen on the easier side and the graphics at very well done and have the look the ne kids will like. Getting this game is that after the especially if you have player and denjoyed, the first version. Definition a must have for the beginning gamer

They're back for a second adventure on the NES. The gather a split into a variety of sub-games, as one with a different favorite toon. The majority of levels are loaded with terrificial with the results of the roller coaster. This cart proves as a well rounded 8-Bit cart with lots of solid play.

Tiny Toons 2 is a great cutesy game for the kids to toy around the challenge is decent, and the gratin is are as good as 8-Bit can get, by on't expect too much wonderment wonderland. My only complaint is mack of decent techniques for the second gamers to control. The game is over-simplified!

Use your magical wand to create and destroy blocks of ice as you combat these fire hazards! In a unique edit mode, you may create your own maze. But first "ice" those flames!

While some players might like this type of game. I found the like the public period of the puzzle was different, the idea did the mange. The puzzles did continue the part of the puzzles did continue the game and this challenge could hough to keep some people coming back for more.

An 8 for a NES game? You bet! I love the thinking/puzzle type game and Fire and loe is right up sat line. While the puzzles start off eas, the less in the later stages are downers in the later stages are downers and playing I found out that I just control best puzzle game in years!

He must fight through levels filled with creepy ghosts and birds in order to remember the spells. Hop on the rotating bridges or the roller coaster for a fun-filled adventure!

Konami has a great GameBoy game that offers game players to dvariety, fun and enjoyment. Why the game is not revolutionary it do see a tried and true concept and appears to this game. The graphics an experience art is very well done. Another hit from Konami.

Now this is a great GameBoy cart I really like the character, and he looks quite unusual. The game plays very well and is well designed to the GameBoy. Any faster, and the action would start blurring. Another and point is the fact that it is a game and the people of all ages will enjoy playing

This is one of the better GameBoy carts that I've played. The feet is kind of strange, but he that a to of technique. The different direction of fire are cool and the R-type more style power-ups keep things interesting. The bosses are cute and also of a challenge. A solid cart with lots of vanety

Yippie, another GameBoy game! Kid Dracula is a strange with a strange plot. It's okay as fa as games go, but it moves too slow! our occount for the GameBoy's horrible button g problem. The enemies are ventoase plast into oblivon, so get this play video games.

For all you portable fans that have been craving some challenge, Milon's Secret Castle by Hudson has answered the call.

As Milon, your goal is to rescue the fair maiden. Along the way you'll encounter hidden doors, passageways, shops, and of course, tons of bosses! It's not as easy as it sounds, though - this quest requires thinking and technique to make it. Grab your GameBoy and get started!

This was a popular NES game a few years back. In its curry GameBoy form, a whole new generator of players will be able to run throu or the offerent mazes hunting for the reden may just as we did in the 80's. The fire few levels are easy but as you game starts to get teeth.

Another puzzle/maze game! This is my lucky month. Other players will also appreciate the mode treasures and challenges that awart som in this game. One good thing about its cart is the fact that you can take anywhere and it is very well suited portable playing on a long drive in the car.

This game is practically a direct translation of the NES care the black and white underdog. The sphics are OK, but it's hard to see the one use against the backgrounds. The game is filled with secrets and lots item and power-ups. The challenge is used to the one of the companion of the companio

As yet another victim of the GameBoy, Milon's Secret Case, and Id be better, but as it is, it's box as copects and enemies are hard to distribute from the background, making gamely play irritating. It's another game for ginners, since they don't really sometimes they're missing! No Cupie doll for this one.

The Game Gear games are getting better as time goes on. This to do not the popular series offers sorte of the best graphics, game play an sorte of the system. Even though better that berage, it is still a long ways aw the form qualling one of the home version a good game to play when you're not near a TV.

Spidy is back and he is boking good it is portable fun that the coming back for more as with a cozon evels you certainly won't finish this fart in one sitting. The graphics improved me as did the control. While new difficult game it makes up for it used. A good game to take to your aunts house for Easter.

This is a slightly above average cart for the GG. The graphics pretty good and the sounds are noting to shout about. The game seems y settly too fast for the GG's small screen in the echniques and solid play keep langer. In the bosses are cool and are set familiar villains from the series

It's hard to get excited over this Spider-Man, since it feet of first one in every way. This one does it add enough new techniques or spiring dup graphics to rate high. As a game or cells solid enough to stand on its own you own the first, it really couldn't whether or not you should get the sequel, but it couldn't hurt.

..Sega CD Price Drop...Pioneer's New Laser-Active System...Street Fighter 2 Modem...Total Carnage in 8-Meg. ...Mortal Kombat Coming in August...Sonic and Friends Hit the TV Screen...A New Breed of Magazine...

...Hello all you little game boys and girls out there in video game land, 'tis the master of gaming goodles and all-around swell stuff, Quartermann, back to the pages of EGM once again to give you the slickest skinny of what the in-crowd is doing! We've got a very special theme this month my Quarter-friends, with more insider info from the halls of the CES as well as the Q-Mann's usual bag o' trix! So let's start the show...The top rumor rippin' its way across the Q-Minator's desk this month concerns talk of a Sega CD price drop of thermonuclear proportions! Fueled by some hot and heavy fan interest over the holidays, Sega plans to prep future sates of their super CD system going into X-Mas of '93 with a mega slash-and-burn in the current 300 buck entry feel Word on the street says the Sega CD could fall below the \$200 mark going into the holidays - at the same time dozens of new licensees hit with some power-packed softs. Sega's hitting all the right buttons, and even if the big 'N's gaming gurus get their CD machine together in time to meet announced delivery dates at the under-200 level, Sega will already be there! Leave it to Master-Q to keep you updated...Speaking of CD, Pioneer's Laser-Active laserdisc/video game mega machine won't be seeing the stork until July. So start saving up your pennies, kiddles, because you're going to need 120,000 of them...

...More nifty news from the Q-Mann's corner concerns a fighting master's dream come true. A secret group of hard-heads are in the final stages of perfecting a special modem that will allow Street Fighter 2 fans to play each other over the phone lines! Dig it! This peripheral, which could be ready by summertime, will let you interact across town or across the country with other SF2 fans who are equally equipped with modem and game. The best part of the plan? The Street Fighter 2 modem will clock in at under the price of the SF2 game...Total Carnage, contrary to other erroneous reports, will be coming to stores via Black Pearl Software, not Acclaim. The cart will come configured in 8-Meg mode, with an enhanced Sega CD version materializing at year's end...Turbo fans, don't despair! The first CD game system will expand later this year with a special CD version of John Madden now in development. Also, the 16-Meg Fighting Street 2 game that the Q-Mann reported on several months back may change to an even more enhanced cart/CD combo that will not only increase interaction and game play, but also pump in a variety of speech and video effects that follow the plotline of everyone's favorite beat-em-up...

...While we're on the subject of fighting games, you'll have to wait until August for Mortal Kombat to make its way onto the consumer formats. Both the Sega Genesis (blood and guts) and Nintendo (rated G) versions should show up around the same time new versions of Street Fighter 2 pop up for some new systems. Don't believe the ink you see in other mags, my little Quarter-freaks, because in addition to the CD SF2 (which those close to the project indicate will be packed with video, voice and more) the rumor mill is adamant that there will be a cart translation for Sega fans as well. Nothing is confirmed, but the EGM offices are drooling with delight...

...The Battle of the Toons is about to begin. Super-star Sonic the Hedgehog and his universe of crazy critters are on their way to ABC for both a prime-time special and a possible Saturday morning series replete with Tails, Dr. Robotnik and others. Out to ruin their day is a new weekly flick being developed around the day to day escapades of one Bubsy the Bobcat! Who will survive? Who will grab the magical rating point to power-up? Does anyone care?...ETW. did you know that for a very short time the Robotnik character was considered for the lead in Sonic the Hedgehog? I don't know how well Sega would be doing with a fat clown as their mascot, but fortunately they found the name Sonic as hard to attach to the evil dude as the rest of humanity...My pigskin prayers have been answered! Tecmo Super Bowl will not only plow its way onto the Genesis when the next season starts, but also the Super NES...Other Tecmo news includes the return of Ryu in a 16-Bit version of Ninja Gaiden on the Super NES...

...Time Gal will return to the U.S. courtesy of Renovation - our head ed. Ed was suffering from "foot in the mouth" disease when he indicated Sega may lap up the latest in push game technology. By the way, the Q-Mann loves Road Avengers - check out my complete review in this month's Q-Letter that's free to EGM subscribers!...There's a tidal wave of Sega six-button sticks on the way, including controllers from Tengen and Beeshu! The best of the bunch may be C&L Control's Sega update to their award-winning Champion stick - the Q-Mann can't wait to have one - or a game that you can play with it!...

...That wraps up the Quarter-Witt's column for this month, but don't forget to tune in next month for more hot gossip from inside and out the world of video games! Also, all you EGM subscribers out there should look for the hidden Q-Mann message in this issue's special Quartermann Q-Letter. Also, next month the Q-Letter will have a very special contest with some, shall we say, "interesting" prizes. So don't miss out on the fun and don't miss the Quartermann's newest gaming column soon to come in the pages of HERO ILLUSTRATED magazine! If you thought other mags had insight in their game reviews/previews, wait until you see what yours truly has to say...

# **NEW DUO-R COMING IN DECEMBER**

NEC Home Electronics of Japan has just announced that they will be bringing out a new version of the PC Engine Duo later this Spring.

Called the Duo-R, this new machine will look and perform very much like the existing system. The major difference will be in the cost of the machine as NEC is reducing the retail price in Japan from \$475 to \$320 (59,800 ¥ to 39,800 ¥).

To achieve the new price, several minor modifications have been made to the older PC Engine Duo. The most obvious change is the color. The new Duo-R will be greyish-white rather than charcoal

The new Duo-R may be coming to the U.S. later this year.
With some features removed, it could sell for \$200.

black as in the old Duo. Gone also is the earphone jack and the volume control. The same with the CD cover lock. The system specifications have remained the same, though in order to keep all of the

different versions of the system compatible.

The styling will also undergo a facelift. NEC wanted the new system to be made smoother and sleeker. Many of the straight lines in the Duo's shape have been replaced with curves. To do this, the Duo-R had to be made about one half inch thicker and slightly longer and wider.

One item that is important to note is the fact that the U.S. Duo is currently being sold cheaper (\$299) than its Japanese counterpart. Officials at T.T.I. have stated that this was done in order to build up enthusiasm in America for the new Duo. Since the PC Engine is already very popular in Japan, the Duo over there didn't have to be sold at such a low cost.

When questioned as to whether the new system will appear in America, T.T.I. officials stated that they are presently looking at the new Duo-R, and they will see how it will fit into their overall marketing plan. They will make a decision later this year as to whether it will be brought out over here. They state that their major concern for the first half of this year is to substantially increase the number of games, and after that, they will look at the hardware.

It is believed that when Sega reduces the price of its Sega CD machine from \$299 to \$200 this September, T.T.I. will have to match the price to stay competitive. The easiest way to do this at that time will be to then bring out the lower cost Duo-R.

# FIGHTING STREET 2 TO BE DISK AND CART

EGM has learned from sources close to the Fighting Street 2 development team that NEC of Japan is seriously exploring the possibility of bringing out Fighting Street 2 as the first game which will combine a CD and cartridge. The problem in doing that though, is twofold.

First, because of the small amount of built-in memory in the PC Engine Duo, it is not possible to download all of the necessary parts of the game program from the CD to the system that is needed for a fighting scene.

Second, if the game was to be done as a high memory cartridge (16 to 32 megabit), the game graphically, would be a duplicate of the arcade Champion Edition, but the sounds, audio and background music would have to be severely cut back.

To solve the problem, Japan is currently looking into the possibility of putting the game program on a cartridge, and all of the related sounds and music on a CD. The main hurdle to overcome is how to synchronize everything so that the two formats play as one.

Of course, price is a concern. With so much memory needed for the game, the cost of the cartridge alone would be well over \$100. If a CD were included, the game would retail for more than \$120.

And that says nothing about controllers. While a 3-button pad is available in Japan, there hasn't been any announcement to date of a 6-button stick.

# TOP SECRET FX AND DSP CHIP SPECS REVEALED!

Nintendo has been very busy lately coming up with new ways to spruce up their not-so-old Super NES. Players have been bombarded with promises of a 32-Bit CD-ROM drive, a new DSP chip which allows for faster processing of data, and, most recently, a new FX chip which lets the Super NES play 3-D polygon graphics games.

Last issue we talked about the CD-ROM and this time we'll look at the new chips that Nintendo is putting in its games.

### DSP CHIP

One of the major problems with the Super NES is that it is slow. While it has a 16-Bit processor, it only runs at 2.68 and 3.56 MHz. For most games this is quick enough especially with the introduction of faster game chips and more efficient programming. But, technology moves ahead. What was OK last month is boring this month. So what was Nintendo to do? There was no easy 'fix' for the Super NES, so Nintendo did the next best thing - add more processing power to the game cartridges.

This is both good and bad. It is good for Nintendo, as they can add new chips in the cartridges which will speed up the system. Games can then be more complex as the added processing speed permits faster calculations. It is also good for Nintendo as they can make more money selling the new chips to the software companies. And finally, it is bad for the players as they will have to pay up to \$10

Mario Kart, with a mini DSP chip, offered players good pseudo 3-D racing action.

more per game because of the extra chips.

What is in it for the player? So far the improvements look quite impressive. Games like PilotWings and Super Mario Kart are fun to play. And also quite affordable. But that is where Nintendo is smart. They bring out these wonderful games at 'normal' prices and the players get used to the new technology and want more. As big as Nintendo is, they can swallow the extra cost for the new chips. But when a small third party company makes a DSP (Digital Signal Processor) chip game, they have to charge the players the extra \$10. Such is the case for Dungeon Master and F-1 Roc 2.

If there is good news, at least Nintendo picked a good chip to use. They are using an NEC μPD77C25 chip. It is a very fast chip as it has an instruction cycle of only 100 ns (nannoseconds). This translates to a clock speed of about 10 MHz. It is a completely separate processor and can work independently from the Super NES CPU. When it comes to pseudo 3-D scaling and rotation calculations (as in PilotWings) the chip allows for up to

Super Air Diver by Asmik of Japan is the latest in DSP chip games.

40 times the number of calculations as the Super NES alone. In fact Nintendo themselves state "It is impossible for the Super NES CPU [by tiself] to process such data." Look for more games to feature this chip, but also expect to dig deeper into your wallet to buy the games.

#### **FX CHIP**

Time marches on and the DSP chip is already 'old.' While it can really add new life to the Super NES, Nintendo is moving from pseudo 3-D games to true 3-D polygon graphics games. And, as you guessed, to be able to bring such life-like simulations to the Super NES, there has to be a new chip. Enter the FX chip. Not only is it a high speed microprocessor like the DSP (10.74 MHz clock speed), but the FX chip also has built-in graphic functions which can quickly draw images necessary in polygon processing. Their first game to use this chip is StarFox and it looks good. But, like the DSP chip, Nintendo is telling its third party licensees that the chip will add about \$10 to the retail cost.

Is this the ultimate technology?
No, but Nintendo expects that these two chips will hold them until their CD-ROM is ready next year.

# **SEGA & NINTENDO START 3-D WAR**

Sega and Nintendo are about to lock horns in a new battle. It's not the 16-Bit war, as that one is still going on, but this time it is taking place out of this world... in the third dimension. Both companies are getting ready to launch a new genre of games, those which will attempt to duplicate game play in a realistic 3-D environment.

#### NINTENDO

In one corner is Nintendo. Their game is called StarFox and it simulates combat missions over land, sea and through the darkness of outer space. Centered around a new co-processor built into the cartridge, StarFox features polygon graphics that have texture mapping and light source shading that they claim create realistic simulation experiences.

From the hands-on experience our editors got at the Winter Consumer Electronics Show, StarFox proved to be an excellent shooter. The action moved along quite rapidly, the polygons did have

Which 3-D polygon graphics game would you want to play? Check out the pictures and compare! Can an 8 megabit Super NES cartridge compete with the 4.4 gigabit Sega CD disc?

some shading, and the game played very well. On the negative side, the polygons were very large and coarse, giving an overall impression of a very artificial terrain.

#### SEGA

In the other corner is Sega. Their game is called Silpheed and it is a Sega CD disc. Right away, Sega has the advantage of virtually unlimited memory. And when it comes to polygon graphics, memory is everything. Processing speed is also important but the Sega CD has a very fast and efficient coprocessor built in, and the action in

this game moved along very quickly. The major difference, as you can see from the pictures above, is that Silpheed, when compared to Star-Fox, is extremely detailed and realistic looking. This is because there are over 500,000 polygons in the planet scene alone. Advanced fractal geometry was used to calculate and draw the lights and shadows of the geographical features. Throw in a 'high' frame speed of 20 frames per second, continuous stereo PCM (Pulse Code Modulation) audio, and special sound effects synthesized in surround sound, and you have a game that makes Star Fox look like a NES cart.

Of course it is unfair to compare a CD game with a cartridge, but the FX chip is all that Nintendo has to go up against the competition as their CD machine won't be ready until next year.

If Sega didn't already have a huge 3-D advantage, they will certainly have an even larger one when their Virtual Reality peripheral for the Genesis comes out later this year. Although their VR games are very early in design, from what we were able to see, the concept converts to the home screen quite well.

3-D-O

Not to give Sega a big head with a bunch of praises, the real 3-D winner has to go to the elite 3-D-O machine. This system is so powerful that it can literally do anything, and it does. The 3-D flight simulations shown at the CES were just as if you were there.

# KONIX TO BRING OUT 32-BIT SYSTEM

Remember the ill-fated Konix multi system from a few years ago? It's back!

There is now a joint venture between an English firm called MSU and a Taiwanese manufacturer called TXC. Between them, this time they say they have enough money to make the system a reality and hope to get the machine into production later this year.

Featuring a 32-Bit processor that supposedly runs at an unbelievable 30 MHz, the Konix Multi System just might also include some elements of motion video as well. The system will be a CD-only machine. Officials at Konix are stating that 8 to 10 games will be available at launch time and they predict that 150,000 units will be

sold in the first year. Sales will be directed at England first and then expanded to the rest of Europe. No price has been established yet, but they expect that their system will compete directly with the Sega CD. Perhaps the question should be...does anybody care if another system comes out?

The Konix Multi System is being redone, this time as a CD-only game system.

# SUPER SIDE KICKS

SNK has added another sports title to their list of arcade coinsnatchers. Their latest creation. Super Side kicks.

delivers some very highpowered soccer action.

You can play either alone or against a friend, picking teams from all over the world. The game play is stellar

and includes some great little tidbits such as tackles and slides. Ties are decided by trying a series of penalty kicks which alternate you between the roles of shooter and goalie.

Of course, you get the graphics, sounds and playability that you would come to expect from a coin-op.

If you're ready for something different, give SNK's Super Side kicks

"Ace" is your most agile and fast player. Make sure you always use him wisely!

# HOW IT RATES

SNK has made some great sports games in its time. Super Side kicks is one of these. On the plus side, the action is fast and lively. The ability to tackle and slide into the other players is a welcome addition as are the tiebreaking penalty shot segments. Player control is also exceptional.

On the negative side, I was hoping for better graphics. The angle at which you watch the game should be more "ground level" rather than from a hundred feet up. All things considered, Super Side kicks is a no-nonsense-fun-to-play soccer game which will appeal to fans of the genre.

long list of internationally ranked clubs.

One of the game's highlights is the penalty shot shoot-out. Here, you will get to test your abilities at both shooter and goalie!

# Game Doc Fast Qs; Speedy As!

Q: I have heard that the processor inside the Super NES has three different speeds. Why would anyone want to use the slowest speed?

Dino Pantazopoulos Dracut, MA

A: It's true that the Super NES has three operating speeds, but in almost all cases, the speed is not determined by the programmer. Depending on the task and area of memory being accessed, the Super NES itself selects the most efficient speed for processing data. In other words, nobody ever chooses to run a program at the slowest speed, but if that's the most efficient pace, the Super NES will automatically select it.

By the way, Dino, I loved your envelope art.

And speaking of envelope art and our Draw the Game Doctor contest, this issue we're featuring some of our finest entries. Greg Wilcox of New York City had both the winner in our envelope art competition and an honorable mention in the Draw the Doc contest. Grea hopes to someday become a comics pro and has submitted samples to Dark Horse. The Doc wishes you the best of luck!

You're going to have a problem with your Super NES over here, however, since the British broadcast system [PAL] and ours (NTSC) are non-compatible. Even if it did work, you'd need a power converter because of AC/DC incompatibility.

As for the price of video game software being higher in England than America, you should be used to that by now. Surely you've noticed that everything from cars and computers to meat and musical instruments cost more in Britain than the U.S.

## By Terry Aki

Hello and welcome once again to another high-powered edition of the latest and greatest gossip from Japan. As expected, Final Fantasy V is completely sold out at every shop! I still don't have a copy for myself. Talking with people reveals that those who did get a copy have put in over eighty hours of play and still haven't finished the game. Word on the street is that some retailers are actually holding out for bigger profits on the hottest cart to come along in a while! Sounds kinda shady to me.

I was lucky enough to attend some of the latest game and toy shows in Japan. Most recently was the Amusement Expo '93 on February 16th and 17th, and the Winter CES in Las Vegas on January 7th through the 10th. These were some of the biggest shows at this time of the year with many companies showing off what is to be released throughout the year. It was an exciting time and I brought back plenty of souvenirs to clutter up my desk.

Breath of Fire is a totally original RPG from the masterminds at Capcom of Japan! Spanning many worlds of play, this one will definitely keep you excited and waiting to see what's next.

The most notable feature of Breath of Fire is the fantastic fighting sequences. Whenever you come across an enemy, the view rotates around so you witness a 3/4 view of the battlefield. Here you can conjure up all sorts of wicked spells or clash head-on with swords and staffs blazing!

The game is divided up into several chapters with mini plots in between. Successful completion of these mini plots will allow you to explore new worlds which yield unending power.

Frequently, your party will come across towns which harbor new crew members as well as weapon and medical shops. There are eight characters which can either willingly join the party or you can pay them to help you fight! Expect an April release for Breath of Fire!

The magician casts powerful spells like a lightning strike from heaven.

The characters can interact with others in the town for information.

The fire magic is best used against undead creatures like mummies.

# VIRTUAL COMBAT!

Now here is an item to liven up those boring Monday mornings at the office. This unit is called the Virtual Yarou and offers more features than Laser Tag or Photon from ages past.

The Virtual Shooter is comfortable to hold for those hour long combats.

The Virtual Unit straps on your head and acts as a sensor for attacks.

Basically, it consists of two units called the Virtual Unit and the Virtual Shooter.

The Virtual Unit attaches to your head where a beam of light on the front acts as a sensor. There is a small eyepiece that covers the right eye which displays the number of hits scored on your hapless opponents.

This demonstration shows how this system can really liven up any office!

**GENESIS** 

#### **LEVEL SELECT**

Completing this shooter is not an easy task. For those of you who are having a difficult time with this game, use this level select. It should be a great help. Wait until the SEGA logo appears, and press and hold the C button. While still holding the C button, press these buttons in this order: UP. DIAGONALLY UP-RIGHT. RIGHT, DIAGONALLY

DOWN-RIGHT, DOWN, DIAGONALLY DOWN-LEFT, LEFT, DIAGONAL-LY UP-LEFT, and UP, if you want a simpler way to do it, just start from the top of the pad, and make a clockwise circle all the way around and back to the top. Press START and the stage select screen will appear. Choose the stage you want to start at, and get ready for the action!

At the Sega logo, press and hold the C button.

Do the rest of the trick on the title screen. Now stage select!

#### INVINCIBILITY

Are you having a tough time with the robots in these mechanical fighting matches? Try this code out, and you can fight without taking any damage to your robot. When the title screen appears, and the options screen comes up, choose the "Name Entry" option. The keyboard screen will appear. Put in your name as MUTEKI. Exit this screen and go to

operation BHA. When asked to select your name. put in MUTEKI. Start your game and play as normal. The one major difference you will notice is that you will be invulnerable to all hits. This is a good trick for the people who want to actually fight their opponent rather than instant death (EGM 43 p. 76).

> Benjamin Eric Humphrey Galloway, OH

Enter your name as "Muteki" on the Name Entry screen.

You can now be invincible! Finish the game easily.

#### TRICKMAN'S IN TROUBLE!

We've got major problems! One day, Trickman Terry woke up late (he regularly sleeps through his alarm) and he tried to make up time by driving a bit too fast on his way to work. Well, the boys in Blue nailed him for going 63 in a 50. Ouch! Normally that would amount to a humongous fine, but once the police saw his Trickman license plates, they struck up a conversation. It seems that the officer's boy is a big fan of Trickman, and Terry was able to promise the policeman that the next issue would be the best ever. The smokie was a bit apprehensive of Trickman's boasting. but, when Terry whipped out a new issue and autographed it for the officer's son, he let Terry go with only a warning. The trouble is, the next issue has to be good. So, for Terry's sake, send your best gaming goodles to: Tricks of the Trade, Sendal, 1920 Highland Avenue, Suite 222, Lombard, Illinois 60148.

16 MEG

CARTRIDGE

The enemy is nearly invisible in the thick underbrush of the jungle terrain.

The war has just begun! The rebel forces from Desert Storm have taken refuge deep within the African jungles. Once again, you must pilot the highly advanced helicopter across enemy lines and flush out the vermin before they can strike again.

Jungle Strike offers the same strategic fun as Desert Strike but with 16 Meg behind it, this game offers more enemies to destroy, more obstacles to avoid and more missions to keep your trigger finger firing away!

Start out by getting briefed on the upcoming situation. Learn all about the rebel forces strengths and weaknesses plus their favorite hiding places. Then load up your chopper with missiles, guns and fuel and head into the steamy jungle to fight for peace.

Lock and load! The helicopter handles just like the real version and is just as deadly. Use the radar to locate your targets and possible refuel and reload stations. Saving captured hostages can earn you more armor plating, too! The inhospitable jungles beckon your return for peace.

Not all of the jungle is covered with enemy forces. Your base is nearby.

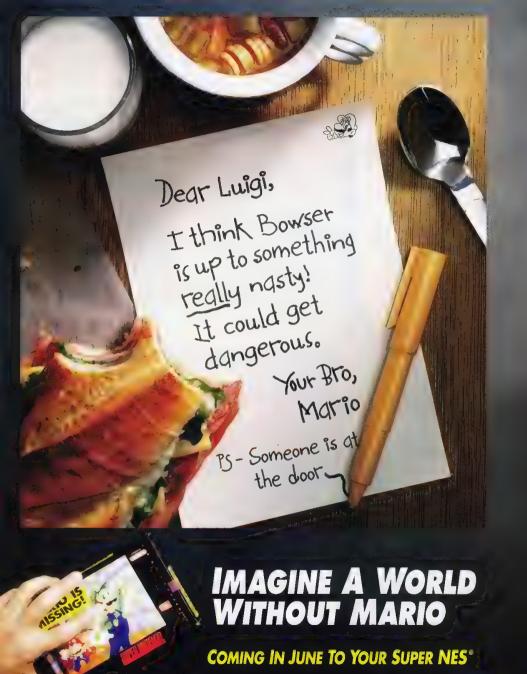

Random gun shots can often pay off by snuffing out the enemy for you.

Listening outposts relay info to the enemy. Be sure to destroy them!

The radar shows where the enemy is located along with needed supplies.

CD-ROM

Revell/Monogram is proud to introduce a whole new way to build model cars. The only difference is that now you can actually take your model car and tear up the race tracks!

Power Modeler is a unique program for the Sega CD because you actually build your model car from an assembly sheet, outfit it with options, then head onto the track and race your creation, all on the Sega CD!

The assembly is unique because it is all done with 3-D animation. You can rotate the model in any direction while controlling every aspect, including decal application and paint work.

Now you can build your favorite cars and not get intoxicated by the glue fumes!

Careen along race courses while dodging other drivers and obstacles!

Build your model in screens like this. Rotate the model to get the best view.

# Dracular The Transfusion from

or fans of Bram Stoker's Dracula who wished they could have somehow taken part in the Gothic thriller, Sony Imagesoft's CD version allows them to do just that.

Throughout development of the game, game designers and programmers worked hand in hand with movie technicians to ensure a faithful adaptation of the haunted tale.

According to Producer Rich Robinson, interaction between movie and. game development began when a group of game designers and programmers sat down with director Francis Ford Coppola.

In the meeting, which took place at the embryonic stage of both the movie and game, Coppola filled the team in on the plot, roles of key characters, and other important details that were yet to take shape on film.

In return, the team presented Coppola with the idea to have seven levels for the game, each representing one of the seven forms of Dracula. Coppola, himself a video game fan, liked the idea and from that

meeting rose the basic premise of the game.

Since the basic plot of the game was decided on so early. Robinson had the luxury of visiting many of Dracula's exotic movie sets - some of which were located in Europe! From these visits. Robinson was able to ensure the highest degree of authenticity between the game and movie

In fact, there was so much interactivity between film and game production, that the rooms created in the CD version of the game used the same blueprint set designers used when building Dracula's castle. Robinson said.

Using a high-powered Silicon Graphics machine, programmers were able to generate realistic rooms and rotate them, choose camera angles and lighting sources at will. All of these advanced techniques are embellished in the CD version of the game.

Once backgrounds were complete ed. Robinson and his team turned their attention to the main character in the game - Jonathon Harker.

Employing a process known as

"blue-screen", designers digitized Harker's character and all his basic movements includ ing walking, kicking punching, jumping etc., (a' la Mortal Kombat).

After playing only a few minutes. Sega CD owners will immediately notice that the CD version makes better use of digital technology than any game that has come before it

Before Dracula many first genera tion CD games suf fered from an over abundance of style and an inadequate amount of substance. The games looked great in their 30 second commer-

Sadie Frost stars as Lucy Westenra, one of Dracula's victims, in Bram Stoker's Dracula. People who were fascinated by Bram Stoker's vision of Dracula will no doubt be absorbed by the Sega CD version of the game, which draws extensively from famous scenes and accurately recreates the Gothic mood.

Dracula (Gary Oldman) and Chesare (Anthony Hopkins) plead with God to spare Elisabeta (Winona Ryder). Although cinema screens from the CD version of the game aren't quite as crisp as these photos, they bring a new degree of realism and new meaning to the term "movie license."

cials, but actual game play was reduced to simple joystick commands.

Robinson says there is a very good reason for that. "We (game designers and programmers) are going through a learning curve with the CD format. It is a new technolocut straight from the movie. Dracula on CD strikes the balance between form and function - and has elevated the CD format to a whole new level.

"Sega deserves to be commended for bringing the technology to market," Robinson stated. "They trans-

play with beautiful cinema scenes

and actively playing a part in it, look for action/adventure titles such as Sylvester Stall lone's upcoming Cliffhanger and Amold Schwarzenegger's Last Action Hero to offer gamers an unprecedented amount of intell activity between themselves and their favorite movie heroes in the CD translations

Sports games will also be enhanced by CD technology, Sony Imagesoft is preparing football and baseball cames - both licensed by ESPN - that will include sports clips and cuts to the ESPN Sportscenter as well as interactive broadcast commentary based on the score.

"I think the CD gaming market will explode in the coming year," Robinson predicted. With the release of

Bram Stoker's Dracula, that explosion may have already begun.

my that we're still exploring and ask ing questions such as: How do you effectively integrate full-motion video into a game? How do you best utilize the 500 times more space a CD has over a cartridge?"

Robinson and his team seem to have answered those questions with Dracula, Combining realistic game

formed the technology from a future istic concept to here and now."

Robinson said future games will employ CD technology better than even Dracula. "The CD platform has enormous potential and the possibilities are exciting."

As CD technology blurs the line between passively watching a movie

Dracula ponders the fate of Elisabeta. Maybe you can make a difference in the game from Sony Imagesoft.

#### THE GRADE ENTRANCE IS ON THE SEGA ED

Said to be the Masterpiece of all the video game versions of Dracula, the Sega CD rendition is truly a spectacle to see! Not only is it filled with great music and sounds, but with CD memory, the levels were computer generated and mathematically placed with awesome detail!

# MAGNETO HAS RETURNED!

The master of magnetism: Magneto has taken control of the Danger Room, The Danger Room is the training ground of the X-Men, a group of people with mutant powers, not to mention the primary adversary, Magneto. Four members of the X-Men were training in the Danger Room when they lost control: Gambit, Wolverine, Cyclops and Nightcrawler. Finding themselves thrust in a dangerous world of illusions, they must find Magneto and the band of evil mutants to stop them! It won't be easy, as the illusions are so realistic, they can kill! The X-Men will be in strange places such as the Savage Land and the war-torn future!

X-Men features an optional twoplayer mode, and has seven levels filled with intense action. Each of the four characters has special moves. and are better at some levels than others. The levels are based on famous comic locales, and are sure to please X-Men fans. Even the enemies are here, like the ferocious Juggernaut! If you like adventure that's packed with action, help out the X-Men in their latest adventure!

# WOLVERINE

# TAKE AIM AGAINST THE MUTANT HORDE!

Mutants of the evil horde will attack you from

every direction. To counter their assault, your tank is equipped with a cannon turret that can be rotated in a multitude of angles. The topview areas let you aim in any of 16 directions. That's almost 360 degrees of aiming!

# A WAY OUT?

Several doors in each level lead to the way out. You can go through them in or out of the tank. Choose the doors correctly as some of them hide a level boss!

Find your way to the boss, and the action will be magnified including the size of the characters.

# STAGE ONE

The first level sets you in the middle of the mountains where hordes of evil mutants have made parts of the mountain forest their home. They are ready to attack any intruder who dares to break their peace. Look out for many giant bees and beetles. There are also troops of walking mechs patrolling the forest.

As you move on, you'll fall down into the caverns deep within the mountains where a giant bee boss guards the domain. After defeating the boss, you'd think you had finished the level, but you must make it through an overhead maze filled to the brim with tanks, traps and a load of pillboxes!

# STAGE TWO

Onto the second stage. Game play in this area is similar to the first, except that you must disembark your vehicle more often to get through certain areas, obtain certain weapons/health, or to face a boss

The first two stages are really tough and the next six will most certainly test your skills. There are lava areas with monsters just waiting to get their hot hands on you. Areas loaded with mechs and twisted, manuacal robots are poised to blast you on sight. But wait, there's more! The last boss will attack with reckless abandon so get ready!

# **LEVEL 2: PIER PRESSURE**

At the dock, Spot must do his first climbing here! 1) Spitting fish abound here. Get even with them, but don't jump near them - or get hit by their spit!

2) The rotting sections you can walk through! 3) These spiked balls are usually placed at the bottom of ropes, so be careful when you climb to the end of them! 4) Another of your buddies - this one is in the far right corner!

LEVEL 3: OFF THE WALL 1) Watch for hidden dots lurking behind the pipes! 2) Mousetraps are helpful only if you jump on their right side! 3) Pajama-clad mice will throw cheese at you. However, if you shoot them in midair, they will dissolve! 4) And now Spot will free his friend... Oops! Spot didn't get enough dots to finish the level; now he must go back and get the required amount!

# **LEVEL 4: WADING AROUND** Go from inflated swimming pool to toy blimps!

# PREPARE FOR BATTLE!

Battles are a large part of this game, and you need to think out your strategy to survive. The basic rule of thumb is to have your strongest fighters close in on the enemy, with your healers close behind. Station your archers a short distance away, and bombard your opposition. If you have flying troops, use them to surround your foes. Keep this in mind, and you'll survive the toughest foes.

# TOWNS

As you wander through the land of Rune in search of allies, you will encounter a variety of different towns, Each town has shops and other helpful places that are essential to your survival. You can find valuable information or even an addtion to your party in some towns! You can also save your game in the towns.

## THE **HEROES RETURN!**

It has been quite some time since Joe Higashi and the Bogard boys defeated Geese Howard in his high rise loft. Since then, they have gone their separate ways to hone their already impressive skills. Now. the next King of Fighters tournament has begun, and several new contestants have entered the frav.

Unbeknownst to these eight fear less warriors, a new lethal force has risen in the wake of Geese Howard's defeat. Even now he has been stalking the former World Champions who competed in the last tournament, dispatching each methodically and mercilessly.

In Fatal Fury 2, you take control of any of the eight main warriors as you battle to become the world's strongest fighter. Each combatant is armed with a slew of deadly special attacks which you must learn and master in order to defeat your new and powerful adversaries. After

defeating the main eight war riors, you must face off against four tough bosses

## **ALL NEW FIGHTERS!**

Choose any of these buff fighters to reach the top! A second player can even choose the same character and join in!

Terry is a fierce martial arts master who enjoys street fighting.

Andy, Terry's younger brother, studies the ancient art of Koppo.

Joe Higashi is a young Muetai expert with a wicked temper.

Big Bear is the wrestling champion with lethal attacks.

Jubei is a Judo expert that can grab opponents out of the airl

Cheng, while rotund. can pack a wallop with his Belly Blast

Kim studies Taikwando and is as egotistical as he is skilled.

Mai has trained in the mystical arts of the Ninja since childhood:

Someone is attacking the former champions without mercy! Only a true King of Fighters can deal with this new evil!

This special attack for Mai is only usable in her level! Hold down, then press up and punch to swan dive on your enemy!

# PREPARE YOURSELF FOR A NEW BREED OF MAGAZINE

COMING THIS JUNE FROM THE PUBLISHERS OF <u>EGM</u>!

## WHEN HINTENDE YOU'RE HOT. YOU'RE HOT!

In a faraway land there is a place called Coolmint Island. It was once peaceful, but that was before the evil Fire Wizard came. With his armies of flame he has taken over the island. You have been chosen by the elders to defeat the fire beasts. To aid in your quest you are given a magic wand. With this wand you can create and destroy blocks of ice.

Eight worlds filled with puzzling fun await you! The game also has an edit mode where you can create your own puzzles. Can you vanquish the fires that threaten?

## HERE'S A SAMPLE OF HOT STRATEGY!

1. Start out by destroying the block in the upper right-hand corner. Fall and then push the block left one space. 2. Climb over the two blocks and push the next block to the left. 3. Climb to the upper left corner and push the block at the top over and destroy the block underneath it.

4. Fall down the hole and blast the block that is in the wall on the far left, 5. This causes the large block of ice to fall

and will get rid of all the flames on the bottom for an easy victory.

## COOL EDIT MODE

- PIPE : VERTICAL PIPÉ: HOREZUNIAL
- PIPE: WPPER-REGHT
- PRES LOWER-LEFT
- PIPE: UPPER-16FT
- E IEE : RIGHT END
- With the edit mode, you can customize your own levels!

# DAMR

It's a lot of fun to see how well you do on the puzzles you create.

## THINGS YOU'LL FACE IN YOUR QUEST!

POT Turns to flame when flames are dropped on it.

Melts ice dropped on it, and burns you to a crisp!

**ICE LEDGE** Ice frozen to a brick will provide a ledge.

BRICK An unmovable. unbreakable obstacle.

## **ICE BLOCK** Can put out flames, and

make bridges.

Can extinguish flames, and withstand heat.

## FLAMES

These little buggers are what you have to kill.

## **TUBES**

# HaveA Braudh

Doomsday Warrior brings outrageous fighting action to the Super Nintendo Entertainment System. Take on the Doom Squad in a fight to the finish or challenge a friend for a head-to-head all out brawl. Either way, pump up your skills and prepare for battle. Can you discover the 15 secret attack moves? If not, it could spell your doom.

Become one of seven fearless fighters and save Earth!

## Bring a friend and have a brawl!

If you pound someone on the ice too often, you'll wind up out of the game.

## **SPECIAL TEAM UNIFORMS!**

You will be able to wear a team's uniform if you beat them!

## COLD STEEL. **HOT BLOOD!**

Crash is back with his buds to take on the rival gangs again. This time around, the boys have decided to settle their differences by playing hockey. Like all the gang activities, this one is steeped with violence. Eight gangs will go at it head-tohead to prove who is the best. Five different rinks, along with special moves set this cart above most NES hockey games. Each team has their own personality, and with the radical two-player mode, you can challenge your friends. If you go in alone, the computer gets really tough. One of the best NES hockey games ever!

## DIAMONDS ARE A DUCK'S BEST FRIENDI

Scrooge McDuck is off on another quest to find lost treasures around the world. Armed with his nasty cane, he can pogo through almost everything. He won't be alone, though: Huey, Dewey, and Louie are out there to offer advice. Even Launchpad is offering his help.

The play techniques are almost exactly the same, with only the special ability to pull items added. This cart is graphically superior to its predecessor. There are many mysteries in each level as well as the hidden world of Atlantis that you must discover on your own!

After completing a level you will go to the item shop where power-ups are sold.

## MASTER THESE GREAT TECHNIQUES TO WIN

Try Race Drivin' for the GameBox and experience the big thrills of the greade in a little package

Try to have enough speed built up when approaching a loop, or you'll crash!

Be very cautious on the ramps and try to hit them while going perfectly straight

## THREE TYPES OF CHALLENGING COURSES!

## **AUTOCROSS**

A challenging race against the clock. Cross checkpoints to get added time!

## STUNT

Race against other drivers over ramps and loops! This one is a real challenge!

## SUPER STUNT

A twisting nightmare of loops, ramps, and tunnels. Only the best drivers will survive!

## Choose different cars and transmissions!

## (Auto and Manual)

A very quick yet maneuverable car designed for quick acceleration and precise han-

dling. Good for novices

because of auto trans.

## Speedster

(Manual)

Built for pure, unadulterated acceleration and speed. Some handling has been sacrificed to give this speedy car unmatched power.

## Roadster

(Manual)

A real "driver's car."
Ultimate control and handling, with mediocre
speed. Top speed is not
as impressive as the
other cars.

## SLIME WORLD LEVEL ONE

Each stage in the game is huge with lots of places to explore. Make sure to check every possible location for 'M' icons to get to the bonus level. There are also hidden platforms. The map to the left is about 1/5 of the entire screen.

## TIME TO RECYCLE!

There are several of these McDonald icons scattered throughout the levels. If you find a certain number of them in any level, you will be transported to the bonus level where you must catch falling litter and recycle it in the correct bin. Only one piece of litter may be carried at a time. The level's over when a piece of litter comes to rest.

## **BIG MICK AND MACK ATTACK!**

Help! The world is being polluted with green slime. Large gook and gunk machines are spreading them everywhere from the cliffs to the cities to the polar regions.

But never fear, (drum roll) Mick and Mack are here! Take on the role of one of McDonaldland's kid heroes and rid the world of the green slop. Armed with a powerful ecologysaving Super Soaker, you venture through large areas filled with mutated creatures and harmful pollutants.

The graphics of this GG version are not as good as its 16-Bit cousin, but the entire game is solid. Fans of the Genesis cart will be impressed! Time to clean up the dirty mess!

## OH, THE THINGS I CAN DO!

## READY. AIM, FIRE! Global gladiators

are armed with the best equipment to help save the ecology of the world. Their Super Soaker can be aimed in any of three directions: up. straight or down. This lets them

shoot from a safe area.

## World's First Ever Tie-Dye Container

Ben & Jerry, famous for their eccentrically named but wonderfully delicious ice cream, may have outdone even themselves.

Their new flavor, Wavy Gravy, is set to debut this Spring in the world's first ever tie-dyed ice cream container.

Named after Hugh

Romney (aka: Wavy Gravy) the clown prince of the Woodstock generation, the flavor is a blend of caramelbrazil nut ice cream, carmel fudge, chocolate chunks, and toffee crunch tidloits.

Wavy Gravy joins other famous Ben & Jerry's flavors such as Cherry Garcia and Chunky Monkey.

## **Hare Jordan Humor**

Unless you've been living in a cave, you've seen the Nike "Aerospace Jordan" commercial, which debuted during the Superbowl telecast on January 31.

In the commercial, Nike introduced the new Air Jordan basketball shoes. Unfortunately, the sneakers aren't as cool as the 90 second spot.

More interesting is the commercial itself, which features Michael and Bugs going to Mars where they take on Marvin the Martian and his team of goons in a

game of basketball.

Besides, who cares about the shoes, the commercials are hilarious.

The question of the day...
"Which one of these two is more
famous - Bugs or Mike?"

## **Street Fighter Comic Arrives**

For those who still can't get enough of Ken, Chun Li and the boys, you can now follow them in their very own title from Malibu Comics.

The hottest video game of the '90s is now poised to become the hottest comic of the '90s.

Although EGM readers get an exclusive preview of the title in this issue, the regular series kicks off in May.

The series will be written by Len Strazewski, one of the star writers of Malibu's Ultraverse, and illustrated by hot newcomers Don Hillsman and Jeff Whiting.

Malibu and Capcom USA, the game's U.S. distributor, are working on a number of promotions, including a contest to give away two free Street Fighter 2 arcade pames.

Worldwide, the Street Fighter 2 game has sold more than 50,000 arcade units in an industry where 3,000 units qualifies as a hit.

Even more staggering, Capcom has sold more than 3.5 million home video cartridges for the Super Nintendo.

Street Fighter's popularity and huge financial windfall rivals that of Pac Man and is being touted as the entertainment phenomenon of the '90s.

"The Street Fighter comic will be absolutely action-packed, just like the game," Strazewski said. "I'm writing the story to appeal to both comic fans and video game players."

See Ken's devastating "Dragon Punch!" Watch the temperature rise as Dhalsim incinerates his opponents with his mystical "Yoga Flame." And witness crackling spines when Zangief smash-

es his victims into the pavement with a "Spinning Pile Driver."

In issue #1, Bison issues a challenge to Sagat - destroy Ken to lure Ryu into the world arena for a fight to the death.

Strazewski said, "We'll see a brief flashback to an earlier Street Fighter tournament in which Ryu defeats Sagat. The first storyline will involve Sagat's revenge against Ryuand will be bloody." Strazewski even hinted that one of the World Warriors may not survive the series!

According to Creative
Director Torn Mason, "This is
not your average game and
with the comic, we've jacked
up the action and violence to
incredible levels."

Both Mason and Strazewski have been working with Capcom to reveal heretofor unknown secrets about the various fighters.

## CARDS

**One Tough Ticket** 

For the lucky few who were able to attend this year's star-studded NBA All Star festivities in Salt Lake City from February 18 through 21, Fleer Corp. helped make it even better.

As presenting sponsor of the NBA Jam Session, Fleet distributed 12 highly collectible 1992-93 Fleer Ultra Basketball card "tickets."

The top two-thirds of each ticket consists of a premium Fleer Ultra trading card with a photo of one of six Utah Jazz players: Kart "The

Mailman Malone, who officially hosted the Jam Session, Mark Eaton, David Benoit, Jeff Malone, Tyrone Corbin, and John Stockton. The bottom third of the card/licket served as the ticket stub, and lists the date and time of admission to the Jam Session.

During the Jam Session, dubbed, "The first ever interactive basketball festivated designed specifically for fans," attendees had the opportunity to participate in a number of basketball-

themed challenges.

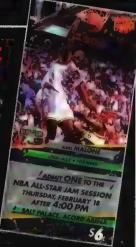

Activities included:

 A dunking exhibition from the most outstanding amateur dunkers in the U.S.

\*Current and former NBA coaches gave hands-on advice to kids on how to improve their hoop skills.

A slam dunk contest for kids from three different age groups.

•A celebrity slam dunk exhibition that included stars such as Charlotte's Larry Johnson and Utah's Maione.

## **TELEVISION**

## Toons Taking Over the Tube?

Now that The Simpsons has established acceptance of animated programming during prime time and Disney's Aladdin recorded the biggest profits ever for an animated feature film (currently more than \$165 million), the entire animation industry appears on the verge of a boom.

An unprecedented number of animation distributors are readying syndicated programs in hopes that the public appetite for animated fare remains strong.

Group W Productions and Fred Wolf Films, for example, hope their new series, The New Adventures of Speed Racer," follows in the webbed footsteps of their smash hit "Teenage Mutant Ninja, Turties."

Universal Cartoon Studios, known for their hit series such as X-Men, The Transformers Ghostbusters, and Muppet Babies has been developing Beethoven, which is based on the popular Universal motion picture. The studio is also launching Exosquad, a half-hour futuristic action adventure series that seems to combine elements from each of their previous hits.

Meanwhile, Hanna-Barbera, responsible for timeless "toons such as The Flintstones, The Jetsons, and Yogi Bear, is offering two new series for syndication - 2 Stupid Dogs, and SWAT Kats.

At Warner Bros. Studios, where officials are still bask-ing in the considerable glow of Batman: The Animated Series' success, Steven Spielberg Presents Animaniacs is being prepared for a Fall '93 release.

With such exciting titles ready for release and many more on the way, the future of Toons looks as bright and shiny as Homer Simpson's bald yellow head.

## **EA Sports a Hit at Superbowl**

EA Sports presence was almost as dominant as the Dallas Cowboys at this year's Superbowl festivities in southern California.

From the authentic EA Sports Studio to the NBC Pre-Superbowl show that featured O.J. Simpson and Mike Ditka playing John Madden Football, EA Sports was among the most visible and appealing in the glut of Superbowl sponsors.

NFL celebrities including Warren Moon, Howie Long, and Ronnie Lott visited the studio which was hosted by EA Sports official announcer Ron Barr.

Many stars admitted to being fans of EA Sports.

EA Sports was a commanding presence at this year's Superbowl festivities. Pictured above are Jonathon Taylor Thomas and Zachary Ty Bryan of the hit show Home Improvement. At left is future Hall-of-Famer Ronnie Lott chatting with Ronn Barr at the EA Sports studio.

## **Marvel Celebrates Spider-Man Milestones**

Even though he is celebrating two significant mile-stones in his long and colorful history, Spider-Man is in the fight for his life against the New Enforcers in a special 48 page 100th issue of Web of Spider-Man. The special 48 page issue, packaged in a special holographic web patterned cover, introduces the brand new Spider-Armor.

Following their introduction in Web of Spider-Man #99. Spidev faces the power of the New Enforcers, a mysterious new criminal group whose ranks include the likes of Dragon Man and Super Adaptoid.

In addition, Web #100 also features the conclusion to the long running storyline involving Bloodrose and Richard Fisk.

Some shocking events wrap up the storyline including the revelation as to just who "Alfredo" really is. And no, it's not the guy for whom: the Fettucini dish was named.

All this adds up to a

Using his web formula as a basis. Peter Parker develops his new "Spider Armor" to give him an edge against not only mob bullets, but the power of the New Enforcers.

To commemorate another milestone in Spider-Man's illustrious career, Spectacular Spider-Man features the ultimate showdown. between Spidey and the Green Goblin.

The 48 page special edition pits Peter Parker against his best friend Harry Osborne in an action-packed final confrontation.

The issue also marks a major turning point in the life of Peter Parker, and the tragic death of an integral Spider-Man character.

Spectacular Spider-Man #200 opens with Spidey returning from his battle with the X-Men only to find that Harry has escaped from captivity and is roaming free as the Green Goblin. Spidey realizes that he must find and stop the Goblin and put an end to this ongoing conflict once and for all.

But Parker is torn by the inner conflict he faces in tracking down this villain. After all,

Harry is Peter's best friend and Peter feels that his exhibiting the Green Goblin persona is a sickness that can be cured. Although hanging out in blue and red long underwear and swinging from building to building isn't exactly normal, either.

Spidey's concern for Harry's welfare is muddled by the fact that the Goblin is a dangerous threat not only to the public, but specifically to Parker and his friends and family since Harry knows that Parker and Spider-Man are one and the same.

Harry, on the other hand is filled with nothing but a desire for revenge on his best friend for what he feels was Parker's deliberate destruction of his life. The result is a violent and final battle between two people who are both ultimate enemies and best friends.

To top all this off, the resulting death of a major character will prevent this issue from providing any happy endings.

With both comics shipping in March, comic book fans have the opportunity to acquire two issues that are certain to become hot collectibles in years to come.

## **Turtles Lead Pack of Spring Movies**

Led by the return of the Teenage Mutant Ninja Turtles, this Spring's crop of movies is far from ordinary. With films set in such exotic places as feudal Japan and the Kalahari desert, the usual Spring doldrums give way to some real adventure.

Disney's A Far Off Place

follows the adventures of

two 14-year-olds in a

quest across the desert.

After a winter where the two biggest blockbusters were vouth-oriented movies Aladdin and Home Alone 2, Hollywood continues to roll out high profile feature films aimed at kids.

The long-awaited third

movie starring the Teenage Mutant Ninia Turtles: The Turtles are Back...In Time leads the pack, with a nationwide debut March 19 in 2.000 movie theaters.

With a massive marketing campaign including tie-ins with New Line Cinema, Burger King and Playmates Toys. Michaelangelo. Leonardo.

Donatello, and Raphael should keep box offices ring ing during the usually dormant Spring season.

Mark Freedman, President of Surge Licensing, Inc., the exclusive worldwide licensor of the Teenage Mutant Ninja Turtles, said "It will be Turtles 3 in 1993," noting that "approximately \$50 milfion in advertising is lined up to support the movie."

Turtles 3 was kicked off at Toy Fair in early February in New York City.

Freedman disclosed some secrets about the PG-rated storyline, "Time travel will play a key role in the adventure of Mega-Stars Michaelangelo, Leonardo, Donatello, and Raphael, The movie has a compelling plot.

Freedman wouldn't go into further detail. EGM has learned more facts about the imaginative storyline.

Reporter April O'Neil unknowingly activates a

magical scepter that enables time travel. Before she can say cowabunga, she's whisked back 400 years to 17th Century Japan.

Never ones to leave a damsel in distress, the fear some foursome find the scepter and are off to rescue April and do battle with the evil warlord Norinaga.

A \$21 million production budget ensured elaborate sets and authentic costumes. Warlord Norinaga's sprawling courtyard and castle, for example, was built from the ground up And an authentic Japanese village complete with bamboo fences and thatch-roofed huts was constructed on a wooded hillside.

To recreate the misty hills and rolling countryside of Feudal Japan, Turtles 3 was shot in Astoria. Oregon.

screen isn't enough, they'll be almost everywhere else anyway courtesy of tie-in promotions including action figures, comic books, bookmarks, stickers, posters, trading cards, clothes, coloring and painting kits, sports bottles and almost anything else that can be printed on.

Although the Turtles will likely dominate the box office this spring, there are other films geared toward kids.

Disney's A Far Off Place

opening March 12, is about two 14-year-olds who must flee to the African wilderness to escape a band of savage poachers. Armed with only their wits and the expertise of a Bushman named Xhabbo, the trio sets out on an adventurous 1,000 mile trek across the Kalahari desert.

Disney is also preparing a remake of the Mark Twain classic Huckelberry Finn, set to hit theaters April 2.

Rules - All scores on Adventure Island 3 must be received by May 15, 1993. If maximum scores are reached, a drawing of all maximum scorers will be conducted to determine prize winners. All scores must be submitted with a legible photo. Void where prohibited. Send SASE to High Scores. 1920 Highland Ave., Sulte 222, Lombard, IL 60148 for an official entry form. One winner per household per year. Score rollovers will be treated the same as maximum scores. Decisions of the judges will be final.

makan has finally destroyed all supernatural evil to free him from his curse of eternal life! But there is yet another hideous twist Death has added to the stew: When he said all supernatural exit must be destroyed, he meant in the entire galaxy - and beyond When you finish the game, a brief epilogue will appear (left) followed by the game credits. However, don't think the game is over If you follow the game credits through to the end, there is still more evil to be destroyed, as Chakan's curse is finally and fully revealed (right)! After that there is one final being of Supernatural evil to be destroyed! If you have any spells, use them! If you defeat this mon-ster, you will see your hour glass shifting for all eternity! If you are defeated by the evil being, or warp out of this area, the game will start over! In either case, Chakan must live with his curse.. forever

where cartoon characters called Doodles are alive. In this bizarre adventure, the Doodles are disturbing the balance between Cool World and Real World. If the balance isn't restored quickly, both worlds will be destroyed! Pit your wits against Doodles like Holli Would, Vegas Vinnie and Slash. They're out to get you—it's up to you to stop them and save the world!

## RETROMAGS

Our goal is to preserve classic video game magazines so that they are not lost permanently.

People interested in helping out in any capacity, please visit us at www.retromags.com.

No profit is made from these scans, nor do we offer anything available from the publishers themselves.

If you come across anyone selling releases from this site, please do not support them and do let us know.

Thank you!
